Professional summary

Senior Data Analyst with an MSc in Management & Finance, specialising in architecting end-to-end BI solutions, commercial data modelling, and customer insights for executive leadership. Proven track record of designing scalable Power BI dashboards, establishing data quality standards, and transforming complex cross-functional datasets into executive narratives that drive commercial decisions and protect revenue margins. Combines strong technical expertise (SQL, Power BI, DAX, Looker, Agentic AI) with background in regulated operational environments to partner with C-suite, Finance, and Operations stakeholders.

Work history

Senior Customer Experience (CX) Data Analyst bet365 – Stoke	05/2026 - current
- Architected cross-functional commercial, onboarding, and operational reporting frameworks in custom C-suite Power BI dashboards to establish all licence reporting from the ground up for American and Canadian market launches. - Defined data governance, validation, and reconciliation standards across high-volume pipelines (processing 100k daily records) to ensure compliance and C-suite report accuracy. - Designed and deployed customer propensity models to identify operational friction, significantly reducing inbound service costs and protecting revenue margins across international territories. - Integrated Large Language Models (LLMs) and AI workflows (Claude Code) into daily operations to accelerate development cycles and automate complex data pipeline tasks.	
Commercial Data Insights Analyst bet365 – Stoke	05/2025 - 05/2026
- Partnered closely with EMEA Country Managers and C-suite stakeholders, consolidating raw data across Acquisition, Commercial Threats, Budgeting, and Forecasting into executive-ready narratives. - Overhauled VIP segmentation frameworks across 15 markets to pinpoint churn drivers, resulting in a newly implemented, data-driven CRM strategy that retained 13% of at-risk revenue through targeted marketing campaigns. - Spearheaded the transition of legacy reporting workflows from Excel into dynamic, automated visualisation software, including Power BI and Looker, building self-serve analytics capabilities for business stakeholders. - Actively coached and upskilled non-technical business stakeholders during the transition to self-serve analytics, ensuring high adoption rates across the EMEA region.	
Operations Management Graduate Scheme bet365 – Stoke	09/2024 - 05/2025
- Completed an extensive cross-functional operations rotation, gaining deep commercial expertise across Fraud and Risk Management, Payments, AML, Verification, and Compliance. - Managed and mentored a remote contact team of 12, prioritising coaching and personal development to empower staff and ensure high-quality service delivery for an international user base. - Fast-tracked into the Data Insights team mid-rotation to bridge operations and data strategy, leveraging a strong foundational understanding of commercial risk and user behaviour to drive advanced analytics.	
Consultant (University-Led Project) Mutual Credit Services – Lancaster/Remote	05/2023 - 08/2023
- Partnered directly with external management to conduct internal business reviews and deliver competitor commercial insights to improve product launch performance. - Developed and presented a strategic local business go-to-market plan, demonstrating strong client-facing communication and the ability to spot business development opportunities.	

Skills

- **Data & Analytics:** Power BI, SQL, Excel, Looker, DAX, Power Query, ETL Processes, Data Pipeline Management, Insights through Visualisation.
 - **Commercial & Financial Modelling:** Commercial Modelling, Forecasting Models, Customer Segmentation, Churn Analysis, Payment Success Waterfalls.
- **Business Tools:** JIRA, CRM Analytics (Zendesk Explore), Report Automation, Agile Working, AI (Large Language Models & Agentic AI)

Projects & Development

Workflow Automation via AI: Designed and deployed custom AI agents through Claude Code to automate repetitive daily workflows and streamline personal task management.

Advanced Data Querying: Independently attained a SQL Certification to advance core database management skills beyond current role requirements.
